DHC Series **Tankless Electric** Water Heaters

- Unlimited Supply of Hot Water
- Sleek Design **Saves Space**
- **Proven Reliability**
- **Major Energy** Savings

Ideal for all point-of-use water heating applications !

STIEBEL ELTRON DHC tankless electric water heaters are the ideal choice for all point-of-use applications in the following settings:

Commercial • Industrial • Institutional

- Office Buildings
- Stores
- Malls
- Warehouses
- Restaurants

- Gas Stations
- Schools
- Hotels/Motels
- Commercial Condominiums
- Manufacturing Facilities

Residential

- Bathroom Sinks
- Kitchen Sinks
- Laundry Areas
- Cabins/Cottages
- Low Flow Showers

The STIEBEL ELTRON DHC tankless water heaters are designed for installation at the point-of-use. The DHC heats water instantaneously as it flows through the unit. Standby heat-losses are completely eliminated. The heating elements are controlled by a flow switch. An exclusive scald-guard thermostat keeps the water temperature within safe limits at all times. Additionally, the DHC water heaters are equipped with a safety high-limit with manual reset. The rugged all copper design ensures many years of reliable service.

The models DHC 3-1, DHC 3-2 and DHC 4-2 are shipped with 0.5 GPM pressure compensating flow reducer/aerators that fit on most faucets. Flow controls and faucet aerators are highly recommended in conjunction with tankless water heaters. No pressure relief valve*, drains, or circulating pumps needed.

*Except in Massachusetts

Engineer's Specifications: The tankless electric water heater shall be equipped with a copper sheathed heating element housed in a copper cylinder. The flow switch that operates the heating element shall be of the mechanical pressure differential type. The unit shall be equipped with a safety high-limit switch with manual reset. In addition, the unit shall be equipped with a separate self-resetting thermostat designed to keep the water temperature at the tap below 130°F. An integral tamper-proof flow adjustment screw shall be provided for the installer so that water flow rates can easily be adjusted. The water connections shall be designed for 1/2" NPT female adapter. The housing shall be made of high impact polycarbonate plastic.

Working pressure	PSI / bar	150 / 10													
Tested to pressure	PSI / bar	300 / 20													
Water connections		1/2" NPT													

* Suitable for supply with cold water

* Tankless water heaters are considered a non-continuous load

* Conductors should be sized to maintain a voltage drop of less than 3% under load

Limited Warranty (Excerpt): STIEBEL ELTRON, Inc. warrants to the original owner that the DHC Series Water Heater will be free from defects in workmanship and materials for a period of THREE YEARS from the date of purchase. Should any part(s) prove to be defective during this period, STIEBEL ELTRON, Inc. will be responsible for replacement of the defective part(s) only. STIEBEL ELTRON, Inc. is not responsible for labor charges.
